DETAILED ACTION

Allowable Subject Matter

Claims 1-9 and 11-23 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor suggests the following limitations in the combination with the remaining elements as disclosed in claims 1 and 16:

1. Regarding claim 1, limitation of a multi-polarized forward feed and dish configuration comprising a multi-polarized forward feed element and a mounting mechanism for mounting of said feed element at a position substantially at said focal point, and wherein said feed element comprises at least two radiative members each having a first end and a second end and wherein said second ends of said radiative members are electrically connected at an apex point and are each disposed outwardly away from said apex point toward said vertex point at an acute angle relative to an imaginary plane intersecting said apex point.
2. Regarding claim 16, limitation of forward feed of a reflector dish configuration comprising a truncated pyramidal conductor that includes a closed truncated side, an open base side, and three closed trapezoidal sides, and wherein an open interior space of said truncated pyramidal conductor encompasses said radiative members such that said apex point is approximately at a center point of said closed truncated side and said radiative members are disposed outwardly away from said closed truncated side toward said open base side.
3. Claims 2-15 and 17-23 are allowable for being dependent claims.
